**DETAILED ACTION**

Applicant's election with traverse of Group I, claims 1-19, in Paper No. 7 is acknowledged. The traversal is on the ground(s) that a) that the claims of Group I and Group II overlap since 1) the claims relate to two generic diseases inflammatory disease or an autoimmune disease; and 2) that a serious burden is not placed on the examiner since the search of claims 1-19 would uncover the same art as a search of claims 20-22. This is not found persuasive because since the applicant admits that the two disorders are generic. The species of diseases claimed also have different etiology. The search of Group I and II would not uncover the art for each of the groups since Group II relates to a method of assaying for cells or tissue involved in a pathology of medical disorders. Each of the groups requires a separate and distinct search of the art which would place a burden on the examiner as they have acquired a separate status in the pharmaceutical art. The method of treatments are classified in class 514 and assaying is classified in class 436. Applicant has not argued that the species are obvious variants or clearly admitted on the record that this is the case.

A further review of the elected claims discloses that claims 1-14 and 16-19 read on rheumatoid arthritis and claim 15 fails to do so since it does not claim an inflammatory disorder.

In view of the various active agents within applicant's claims the following restriction is applicable:

***Election/Restrictions***

Art Unit: 1617

This application contains claims directed to the following patentably distinct species of the claimed invention: The following species of compounds are within applicant's claims: a) 1,5-substituted deoxyuridine derivatives or analogs; b) substituted furanopyrimidone derivatives or analogs; c) phosphoramidate deoxyuridine and d) 5'-phosphoryl deoxyuridine.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 2, 3 and 4 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 1617

the prior art, the evidence or admission may be used in a rejection under 35

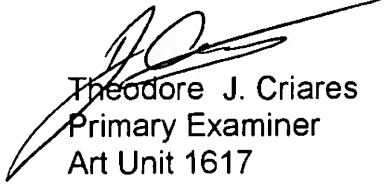

U.S.C. 103(a) of the other invention.

No telephone communication was made on this restriction requirement because the restriction is complex. (MPEP 812.01).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theodore J. Criares whose telephone number is 308-4607. The examiner can normally be reached on 6:30 A.M. to 5:00P.M. Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Theodore J. Criares can be reached on 305-1877. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-6897 for regular communications and N/A for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 308-1235.
